Database Administrator

- 8 years of experience in database, network and system administration in multiple industries
- DBA with extensive SQL Server and moderate Oracle experiences
- Certified Novell Administrator with system configuration experiences on NT
- Experience in designing ER Model and OLAP tools and modifying/reverse-engineering existing data structure via ERwin
- Project management from mission statement generation to department expansion; strong team building and negotiation skills
- Staff training and consulting for up to 3,000 users
- Consulting on vendor systems and enterprise system solutions

TECHNICAL SUMMARY

- Oracle, SQL 7.0/6.5, FoxPro, ERwin, PL/SQL, DB2, DBArtisan
- Windows NT, UNIX, Solaris, DOS, Visio, MS Office
- Application Server, IIS, CICS, SIS, MS BackOffice
- TN3270, Exeter, TCP/IP
- VB, COBOL, HTML, CGI, JAVA
- IBM 30XX including ES/9000, RS/6000, AS400, Macintosh

PROFESSIONAL HIGHLIGHTS

Database Administration

- Managed production and analytical servers with 60 million records and 200 users.
- Managed information systems for over 3,000 students, staff and faculty members.
- Designed data warehouse with OLAP and VB for executives to analyze marketing data
- Designed ER model, mapping and PL/SQL trigger programming for the data integration of finance, marketing, career placement, and admission departments at World University.
- Created triggers, stored procedures, and scheduled tasks, rules, db devices, sys logs and indexes in SQL 6.5 and 7.0.
- Built, installed, configured and tuned Oracle in Solaris server to store 10 million records for Best Telco.
- Designed and implemented security model utilizing Oracle 8 security concepts.
- Performed basic and advanced Oracle database backup and recovery.

- Consulted for performance tuning, capacity planning and database system configuration for Best Healthcare.
